Mondragon Assembly

About us

Mondrago assembly solutions. The parent company in Spain was created in 1977, one of the pioneers in the development of production and assembly technologies. The Group currently has six production plants in Spain, Mexico, France, Germany, China and Brazil, and a subsidiary in India. We also have a strategic network of commercial offices in leading world economies.

Thanks to the continuing success of our customers, we operate in numerous sectors: solar energy, automotive, domestic appliance components, cosmetics, medical devices and electronic components.

- Over 300 employees around the world
- Over 50M€ in sales
- 6 production plants around the world
- 40 years experience
- Innovative production technology

WE ARE PART OF THE **MONDRAGON CORPORATION**, THE LARGEST COOPERATIVE GROUP IN THE WORLD. ESTABLISHED IN 1954, THIS CONSTANTLY EXPANDING GROUP INCLUDES OVER **260 COMPANIES EMPLOYING 75.000 PEOPLE.**

QUALITY

All Mondragon Assembly products are manufactured using top quality materials and are subjected to stringent quality controls, ensuring the safety of the people that interact with our lines and the quality of all of our processes, in collaboration with companies and institutions that certify the quality of our products.

Certifications: ISO 9001, OSHAS, etc.

OUR CUSTOMERS

Our innovative spirit, management excellence and closeness to the customer are the three values that have made Mondragon Assembly a benchmark group for customers worldwide.

COMPANY SOCIAL RESPONSIBILITY

We are a socially responsible group committed to people and their environment. A group that makes a significant effort to develop new manufacturing applications and systems to reduce energy consumption, thereby increasing their efficiency and favouring sustainable development.

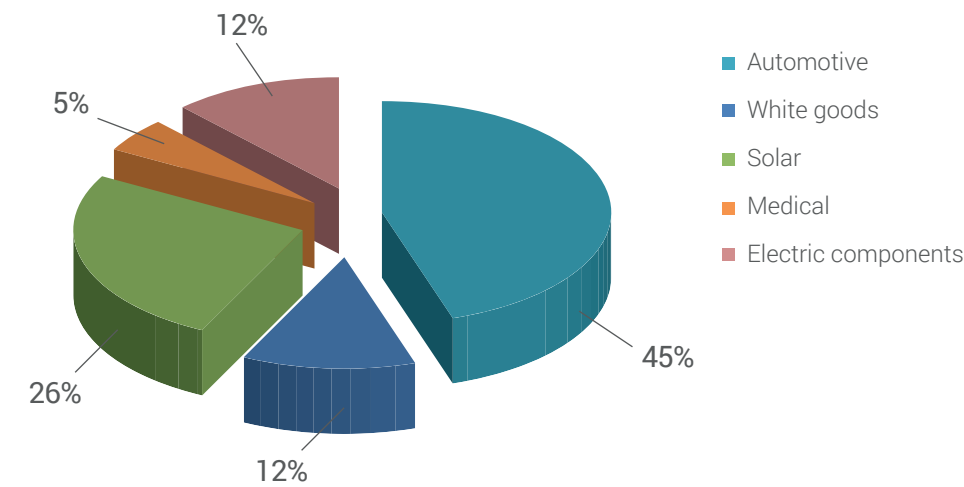

Mondragon Assembly Group

- With over 40 years' automation experience, Mondragon Assembly is a global benchmark in the automated assembly and equipment sector, offering its customers top quality solutions adapted to their needs.
- We specialise in the design, production and installation of a wide range of equipment for assembly process automation. Mondragon Assembly offers solutions that employ the latest technology, that are efficient and of maximum quality.

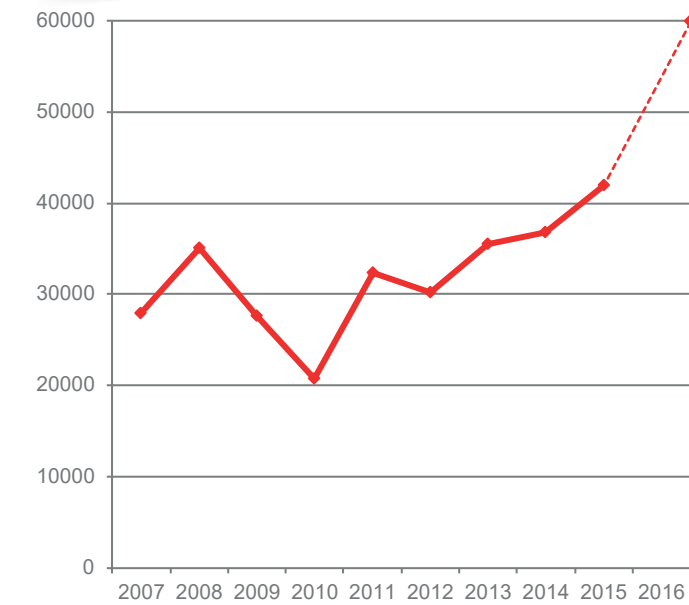

MARKET/SECTORS

In a process of constant innovation and teamwork, Mondragon Assembly, has managed to become a reference worldwide, ensuring our customers efficiency, technology and innovation.

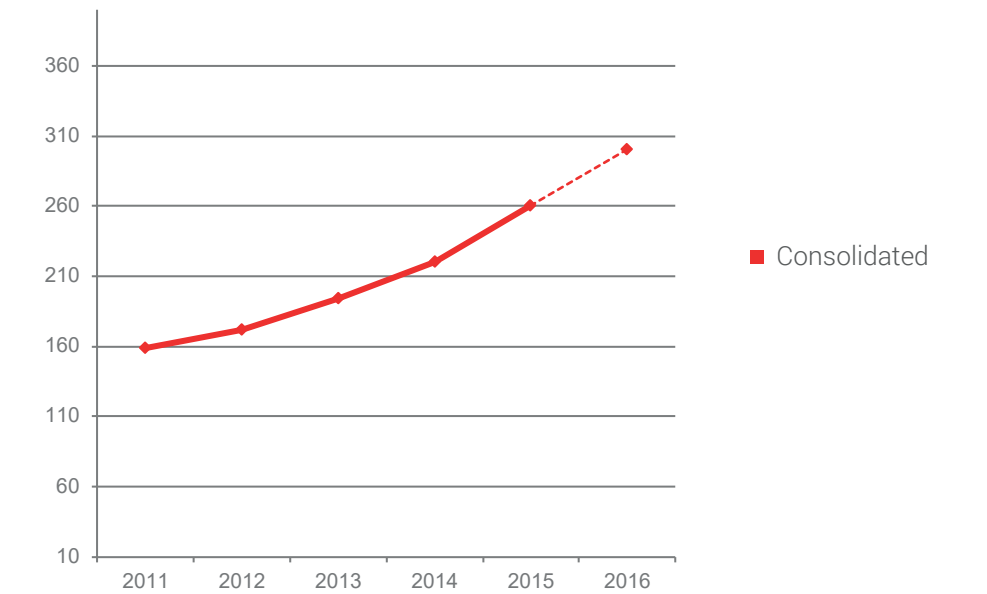

We operate in many sectors being able to provide highly accurate solutions.

SALES

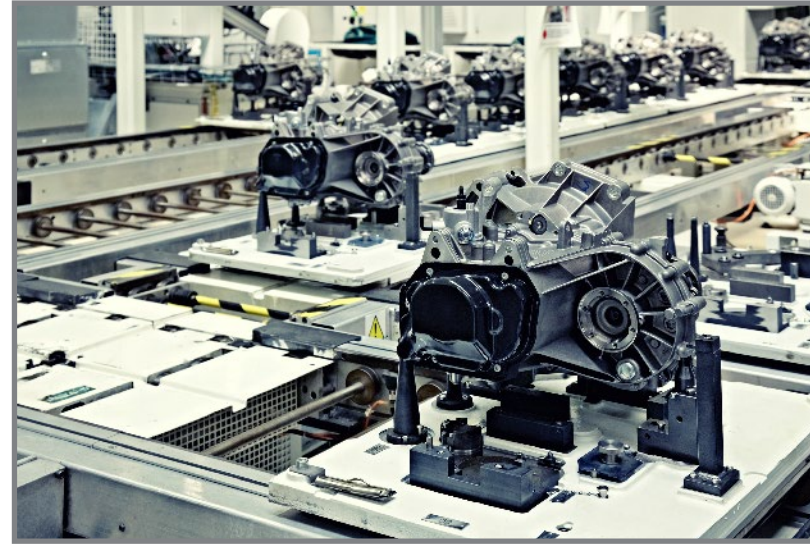

EMPLOYEES

Why us

- 
Experience
 40 years of experience at your service.
- 
Customer orientation
 High number of repeating customers.
- 
Efficiency and Innovation
 One of the biggest companies that apply many high technologies to their products/services.
- 
Projects
 More than 1000 projects.
- 
International presence
 6 Productive plants.
 Partners and subsidiaries.
 We export worldwide.
- 
Sustainable development
 Mondragon Assembly encourages sustainable development.

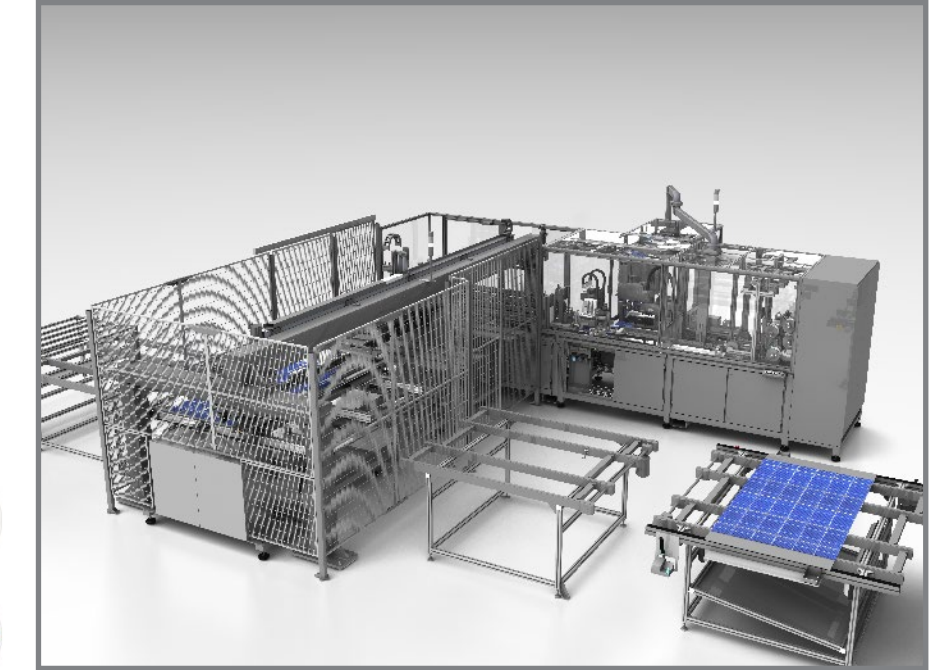

Markets

Solar Energy

Mondragon Assembly is an internationally recognized producer of equipment for the manufacture of solar panels. We design and provide turnkey production lines and machinery for photovoltaic systems. We have been providing innovative manufacturing technology for more than fifteen years.

Mondragon Assembly provide their clients with solutions and services throughout the entire value chain:

- Turnkey solutions with a capacity of between 15MW and 200MW per year
- Automatic and/or semi-automatic machinery: tabber&stringer, interconnections, stringer&layup, cell tester&sorter, laminators and machinery for testing photovoltaic modules
- Design, specifications and sale of raw materials and consumables, development and certification of modules
- Training and know-how
- Personalized solutions: Mondragon Assembly's engineering team offers their experience to help you develop your project.

Markets

Automotive

Mondragon Assembly is a leading company in the design and manufacture of automatic solutions for assembling industrial components. We provide automated solutions, assembly lines and end of line testers for automotive sector components.

The automobile industry is a key sector for the Mondragon Assembly Group. 40 years' experience in this sector have made us one of the leading suppliers of assembly systems for automotive components.

- Turnkey solutions and custom machinery for automatic solutions
- Production of automatic and semi-automatic machinery for automotive components
- Design, assembly, programming and installation of production line up to final project receipt, providing a comprehensive solution
- High productivity, flexibility and excellent quality solutions
- Custom solutions: Mondragon Assembly's engineering team puts its experience at your disposal to help you develop your project

Markets

Electrical Components

Mondragon Assembly is a leading company in the design and manufacture of automatic solutions for assembling electrical components. We are experts in the development of electrical component rapid assembly lines.

We provide automatic solutions and assembly lines with cutting edge technology for electrical components.

- Turnkey solutions and custom machinery for automatic solutions
- Production of automatic and semi-automatic machinery for diverse electrical components
- Design, assembly, programming and installation of production lines up to final project receipt, providing a comprehensive solution
- High productivity, flexibility and excellent quality solutions
- High-speed assembly and quality control solutions for diverse products
- Custom solutions: Mondragon Assembly's engineering team puts its experience at your disposal to help you develop your project

Markets

Medical Devices

Mondragon Assembly is a leading company in the design and manufacture of automatic solutions for assembling medical and pharmaceutical devices.

We provide automatic solutions and assembly lines with cutting edge technology for components in the medical and pharmaceutical sector.

- Turnkey solutions and custom machinery for automatic solutions
- Production of automatic and semi-automatic machinery for medical and pharmaceutical device components
- Design, assembly, programming and installation of production lines up to final project receipt, providing a comprehensive solution
- High productivity, flexibility and excellent quality solutions
- Custom solutions: Mondragon Assembly's engineering team puts its experience at your disposal to help you develop your project
- Compliance with international hygiene standards.

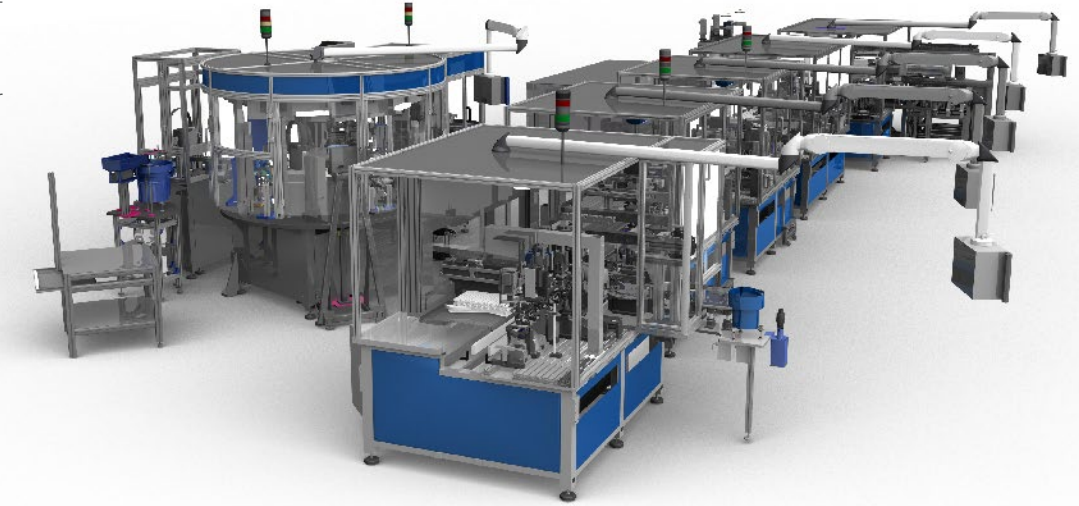

Markets

White Goods

Mondragon Assembly is a leading company in the design and manufacture of automatic solutions for assembling electrical components. We are experts in the development of electrical component rapid assembly lines.

We provide automatic solutions and assembly lines with cutting edge technology for electrical components.

- Turnkey solutions and custom machinery for automatic solutions
- Production of automatic and semi-automatic machinery for diverse electrical components
- Design, assembly, programming and installation of production lines up to final project receipt, providing a comprehensive solution
- High productivity, flexibility and excellent quality solutions
- High-speed assembly and quality control solutions for diverse products
- Custom solutions: Mondragon Assembly's engineering team puts its experience at your disposal to help you develop your project

Markets

Cosmetic

Mondragon Assembly is a leading company in the design and manufacture of automated solutions for assembling cosmetic products.

We provide automatic solutions and assembly lines with cutting edge technology for components in the cosmetics sector.

- Turnkey solutions and custom machinery for automatic solutions
- Production of automatic and semi-automatic machinery for diverse cosmetics components
- Design, assembly, programming and installation of production lines up to final project receipt, providing a comprehensive solution
- High productivity, flexibility and excellent quality solutions
- High-speed assembly and quality control solutions for diverse products
- Custom solutions: Mondragon Assembly's engineering team puts its experience at your disposal to help you develop your project
- Compliance with standard BPF ISO 22716

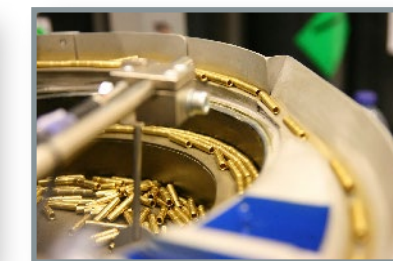

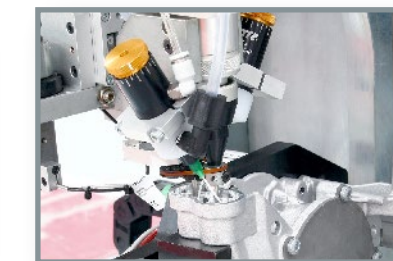

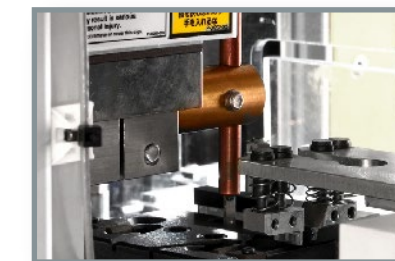

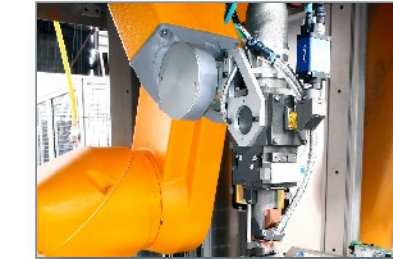

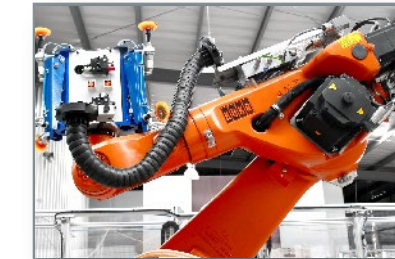

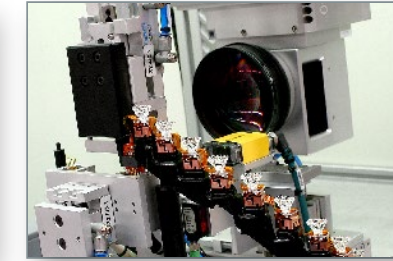

Technologies

Mondragon Assembly integrates the most advanced technologies on the market into its solutions, pioneering the development of new automation applications.

We have a team of highly qualified and specialised engineers, with extensive product, process and technology experience. We offer automated solutions that best adapt to our customers' needs.

Mondragon Assembly's products include the following applied technologies: robotics, artificial vision systems, advanced linear motors, magnetic transfer systems, welding technology systems and collaborative robotics.

- Feeding technologies
- Handling systems
- Robotics
- Joining / forming technics
- Dispensing
- Marking and identification
- Transfers systems
- Vision systems
- Measurements and control
- Soldering and welding
- Product traceability systems
- Networks

Customer Services

Mondragon Assembly has an extensive worldwide partner network providing a fast and effective service. In recent years, we have substantially improved our technical support team, offering the best service to our customers, reducing down-time and guaranteeing the constant safety and functionality of our equipment.

Our technical support services include the following, amongst others:

- Over 50 technicians worldwide
- Remote diagnosis. Remote internet connection and diagnosis and solution for most incidents
- Preventive maintenance programs. Qualified personnel visit to make machinery adjustments and give advice
- Supply of mechanical, electrical, etc., spares. Provision of supplies and raw materials when needed
- Emergency maintenance
- Facility status verification services
- Support and assistance during line commissioning
- Safety inspections and risk analysis
- Modernisation of facilities to revitalise and improve the productivity of older machinery
- Re-engineering of existing lines to improve their performance
- Simplification of the use and maintenance of older equipment by adding new controls
- Equipment and process optimisation
- EC certification for older machinery through modernisation and standard compliance adaptation
- Training programs
